Peace Treaty Will Be Presented to Germans Wednesday Afternoon

Differences with Italy Are to Be Satisfactorily Settled,
According to Latest Report—Belgians Also to Be
Satisfied in Their Claims for Just Terms

PARIS, May 5.—The peace treaty formulated by the Allied and associated powers is to be handed to the German delegates at Versailles on Wednesday afternoon at 3:30 o'clock.

Definite announcement of the time when the Germans are to be made cognizant of the price that Germany must pay for having initiated the world war at last has been made.

With peace measurably near by reason of this fact, there now seems to be good basis for the belief that the differences between Great Britain, France and the United States and Italy over Italy's claim regarding Fiume and the Dalmatian coast may yet be settled in its own accord.

Sigilo, Orlando, the Italian premier, and his foreign minister, Aristide Sornio, are returning to Paris from Rome, where they have been since they left the peace conference more than a week ago, being to inability to reach agreement that Italy considered concessions which would satisfy Italian ambitions.

With the Italian question settled, almost complete unanimity of sentiment would prevail in the peace conference. The obstacle represented by the protests of the Belgians has been surmounted by the Belgian crown council having decided unanimously to sign the treaty, it having been pointed out by the head of the Belgian delegation that the document gave honorable and satisfactory terms to Belgium.

With peace protest against the award of Kiao-Chau to Japan and a number of smaller items are yet under discussion. The council of three met Monday afternoon in an endeavor to settle the minor ones.

The primary session of the peace conference will be held in the afternoon, at which the peace treaty is to be presented to the smaller powers.

Belgian Delegates Have Secured Concessions, Says Their Premier

BRUSSELS, May 5.—(A.P.)—Premier Delaet, in a statement today, said that the Belgian delegates to the peace conference had secured concessions in the terms of the peace treaty and that the Belgian delegates to the peace conference had secured concessions in the terms of the peace treaty and that the Belgian delegates to the peace conference had secured concessions in the terms of the peace treaty.

The "Small Bourgeoisie"

The latest One Big Union bulletin pays its respects to a long list of publications and persons whom it recognizes as being in sympathy with its aims and objects. The Bulletin comes second in the list, as follows:

"Extension Bulletin—the official organ of small bourgeoisie and McArthur interests in E. D. & B. C. road—is more than a match for the rest."

It is well knowing that the "small bourgeoisie" are reckoned as objectionable by the advocates of the One Big Union movement. That assertion serves to identify the ideals of the O.B.U. party. Who and what are the "small bourgeoisie" who are the last paragraph of the article are reckoned among the "evil forces" which are against the O.B.U.?

The dictionary defines "bourgeoisie" as one of the middle class—neither a gentleman nor a peasant. The small bourgeoisie, who do not own, and do not want to own, property. The small bourgeoisie—that is, the men of industry, thrift and responsibility who are recognized by the O.B.U. as "evil forces."

Why are such people "evil forces" in the eyes of the O.B.U. Because they believe in right and justice, and honor and duty? Because they are willing to do their part in the world? Because they are willing to concede to others all that they claim for themselves?

The "small bourgeoisie" which the O.B.U. considers an "evil force" constitute the vast majority of the people of this province of Alberta. It was because they wanted to become "bourgeoisie," or owners, that they came here. They have no apology to offer for themselves, their station in life, or their ambitions. They have rights. They stand by their ideals and are prepared to defend their rights. They don't believe in the nationalization of land any more than they believe in the nationalization of women. The old cry of "Property is robbery and capital is crime," may go strong in the slums of New York or London, but not in Alberta. That cry was coined for conditions in which the majority of the workers were not owners and could never hope to be. It was a cry for the few who owned the majority of workers as owners or were working with the assurance that they can be owners of the land.

It is a weird idea of the O.B.U. that it makes a hit by objecting to the working lands as a "small bourgeoisie" and "evil forces" in this country to which the vast majority of its desirable citizens have come to do the work of acquiring land for their own.

The working landowner, whether he be a farmer, a ranchman, or a man of organized society; the moral, financial and military strength of the state. Most of them will try to run along with out the distinguished approval of the prospective Lenin and Trotsky of the O.B.U.—as The Bulletin is not inferior to do it.

But The Bulletin is also the official organ of the McArthur

railroad interests. Very well, The Bulletin is quite ready to take responsibility for its advocacy of the development of the North country by railways, whether owned by McArthur or anyone else. The country was of no use to the people of the world without railways. It cost money to build, and it cost money to maintain. The Bulletin does not consider the private individual who built, or the Provincial government which enabled him to build, as an enemy of the state or the race. On the contrary, very great benefit has followed the building of the railways and very much greater still will follow in the future. Of course, they will enable many more of those objectionable "small bourgeoisie" to acquire ownership of land and possibly to live comfortably and rear families under desirable conditions. All of which is of course, very deplorable from the O.B.U. point of view.

Yes, The Bulletin advocates the interests of the "small bourgeoisie" and supports a policy of northern development by railways—and is proud to have the privilege of doing so.

A Coal Commission

A suggestion that the Alberta coal industry be placed under an independent board.

The discussion before the Industrial Relations Committee at Calgary on Saturday, as matters stand at present, Alberta has no coal. It is not a fact of the coal industry in this country so situated as to be cheaply mined. It includes a range of quality from high grade to low grade, and is scattered over a wide area. The coal is of such quality that it is not a matter of course to be mined. A small quantity of anthracite, which is not produced in the province, is of such quality that it is not a matter of course to be mined. The development would require 100 miles of new railway construction.

Naturally Alberta mines should supply the province with coal. But they do not. While the mines of Alberta were worked on short time last winter because the coal could not be sold, the greater part of the coal which supplied the province of Manitoba and the eastern part of Saskatchewan came from Pennsylvania, not Alberta. The haul from Pennsylvania to Winnipeg was 1,500 to 3,000 feet, and no transportation. From Pennsylvania there are transshipments and one sharp up-grade rail haul from Port William west.

While mines wages per working ton in Alberta are high the miners had so much off time for lack of demand for coal that they were not paid for it.

If coal cannot be sold it cannot be mined. And if it cannot be sold at a competitive price it cannot be sold at all in the outside market. If the price is so low that it is not restricted to local consumption prohibited, and an undue burden placed upon every other form of Alberta industry which depends on coal for power and the support of domestic life. Cheap coal means a lessening of the cost of living to every one, and an expansion of industry because of decreased producing costs. Dear coal means increased cost of living and restriction of industry generally.

The ability to place Edmonton's coal on the outside market depends not only on the cost of mining but on the rates to all points of consumption. It would be of no profit to the industry if a decrease in the cost of mining were taken by an increase in the cost of reaching the consumer. The miner is entitled to fair wages, the rail carrier to fair charges, and the capitalist to fair share of the return. If one of the three gets more than its fair share it must get it either at the cost of the other two or at the loss of the third. If the coal is to be sold as being as there, there is an element of hope in the suggestion of a commission to control the Alberta coal mining industry. A board on the lines of the railway commission, that would have power to deal with the question of wages and conditions of work; rates and facilities of transportation; conditions of marketing; and protection of the local consumer as to prices, seems to offer a way towards the increased development of the coal industry and the people generally.

The question of government fuel control in vogue during the winter simply meant that the burden on the local consumer was increased, while the market for Alberta coal was being restricted;

Message of Pride and Thanks To Men From Oversea Britain For Sacrifices and Valor Shown

London, May 5.—On the conclusion of the Overseas parade on Saturday, the following message from the King was handed each man:—

"Officers, non-commissioned officers and men of the Overseas Forces:—
"It is with a heart full of pride and gratitude, I take your salute today, as you march in triumph through London. The peoples of the British Dominions beyond the seas, by their instant readiness to share in the trials and responsibilities of the great war, have shown to the world the unity of the British Empire. You, with your comrades from the mother country, vied with one another in noble deeds which will ever be held in proud remembrance. Readily you adapted yourselves to the changing conditions of a new and formidable kind of warfare, and endured physical hardships and exacting mental strain. Whether on the plains of Flanders, the heights of Gallipoli, in France, in Palestine, and other theatres of war, you displayed endurance in defence and vigorous initiative in attack.

"We, and future generations, will never forget the part played by the Canadians in the second battle of Ypres, and on Vimy Ridge; by the Australians and New Zealanders at Gallipoli, and in the advance in France in the spring of 1917, by troops of all the three Dominions in breaking the Hindenburg line last year; the South African brigade's indomitable courage, and the valor of the Royal Newfoundland regiment at Monchy le Preux.

"Now, in the day of victory, I wish to express to you, who represent the Overseas Forces, my unbounded admiration for your splendid feats of arms and the sacrifices you have made. I wish you Godspeed on your homeward journey, with the hope that the outcome of this struggle will assure peace to your children and your children's children."

Y.M.C.A.'s Good Service

CANADIAN

Help Continue
Work for Soldiers
and for Canada.

CANADIAN

"I believe," said Lieut.-General Sir Arthur Currie one day in March, 1918, while the fate of the world was trembling in the balance, "that the authorities should recognize the extremely valuable factor the Y.M.C.A. is in winning battles, and I think you ought to have the personnel and equipment necessary to carry on your work. . . . I do not see how, with the men and materials you have, you can do more than you are doing. But if you can, do so. We need it and appreciate it."

Every public institution is rightfully subject to criticism. The Young Men's Christian Association is no exception. The very magnitude of the Y.M.C.A.'s work for the soldiers brought it under the white light of criticism. But its record of four and a half years has not been successfully assailed.

For every dollar of gross profits made in Y.M.C.A. canteens it was necessary to raise a dollar and a half by public subscription to meet the total expenses of the Overseas services. It will be seen therefore, that absolutely all profits were absorbed in the cost of the service to the soldiers.

The policy of the Y.M.C.A. in its war work was primarily free service, not free supplies, but nevertheless, since December 31st, 1916, soldiers in the Canadian Corps are in France, Belgium and Germany were supplied tea, coffee, cocoa, orangeade and lemonade at the "Y" free. Also cigarettes, chocolate, biscuits, etc. were given free to walking wounded, stretcher bearers, and working parties in cases of emergency. In addition 5% of the sales was distributed among units in the war zone to be spent on extra rations, comforts, etc. for the men. Supplies and cash given away during 1918 amounted to \$299,650.25.

The prices charged in the Y.M.C.A. canteens were fixed by the British War office and were the same as those charged throughout the British Army. These prices were fixed for the protection of the soldiers, and were from 50% to 100% lower than prevailing prices in overseas civilian stores. They were also as low or lower than retail prices in Canada.

Remember these facts when Y.M.C.A. canvassers wait upon you for your subscription to the Red Triangle Fund to-day. The Y.M.C.A. service to soldiers will be maintained until Demobilization is complete—if you will be generous to-day.

Help the Y.M.C.A.'s work for Canada's returning soldiers. Help the Y.M.C.A. extend Red Triangle Service to our industrial workers, and to men and boys of rural Canada.

Help the Y.M.C.A.'s extension of the work for Canada's 300,000 teen-age boys. Help the Y.M.C.A. construct the men who will reconstruct Canada.

Help the Dominion Council, Young Women's Christian Association care for wives and children of our soldiers on the journey to Canada from overseas. Help the Y.W.C.A. extend its service for Canadian women and girls.

The Work of the Red Triangle is Worthy of Canada and of our
Common Canadian Citizenship.
